

APPROACH 2

NETFLIX

NETFLIX

APPROACH 2

PHASED MIGRATION

- flexibility
 - white-glove platform support
 - easier to review and verify
 - pionner app to follow
 - predict effort
 - incremental preparation
 - easier to find / address blockers
- apps lag behind
 - temporary monorepo mess

APPROACH 2

RUNBOOK PER APP

PREPARATION

- Upgrade packages to comply with UIPR
- Replace Application Provider with granular UIPR providers
- Replace custom tools with UIPR
- Implement UIPR-missing features
- Add missing E2E tests

MIGRATION

- Replace granular providers with Web Framework
- Replace standalone configs with Web Framework config
- Switch to Framework mode of react-router
- Update imports to Web Framework generated code

FOLLOW-UPS

- Switch to Web Framework defaults (TS config, eslint, vite, vitest)
- Switch to route-based data loaders
- Create step-by-step adoption guides
- Cleanup
